What Can I Do With A Major In…?

Environmental Studies
Environmental Biology Specialization

The Environmental Biology Specialization Bachelor of Science degree is designed for students wishing to pursue careers in environmental science, research, nature interpretation, environmental education or other allied fields. Emphasis in this program is on experiential learning through internships, service learning and research. The small class sizes, highly individualized instruction, and ready access to many local natural areas enhances learning opportunities.

Program Goals
- Prepare students for careers in the environmental science arena
- Prepare students for graduate study
- Provide students with specialized, extensive, practical experience
- Provide students with service-learning experience in the area of environmental science
